

## Journal Information

The “Proceedings of the CSEE” (Chinese Society for Electrical Engineering) is **ranked first among energy engineering journals and second in terms of citations among Chinese academic journals**. This prestigious position underscores its significant influence and impact in the field of electrical engineering, particularly in energy research. As a leading platform for scholarly work, it publishes cutting-edge research, innovations, and critical advancements that contribute to the development of energy technologies and engineering solutions. Being recognized at such a high level not only highlights the journal’s rigorous academic standards but also emphasizes its essential role in driving progress and shaping the future of electrical engineering in China and beyond.
